

Goliath Technologies Application Availability Monitor for Cerner Patient Portal

Introducing the Goliath Technologies Application Availability Monitor for Cerner Patient Portal. The solution is purpose built to test and confirm the availability of the Cerner Patient Portal. Our technology will logon in the same way that a clinician, caregiver, or patient would and engage the portal to confirm that the underlying architecture, including Cerner Millennium, is working. The goal of this solution is to validate availability of the Patient Portal before patients attempt to gain access. If authentication, page load, logon duration, and dynamic content from the backend system fail to load, or logons take too long, Goliath will proactively alert the administrator so they can address the issue before end users are impacted.

Our technology for Cerner Patient Portal can be deployed in the Cloud, the Datacenter, or at the Hospital to launch sessions on a scheduled basis to Cerner's Datacenter where the Patient Portal is hosted to confirm availability. Because the Patient Portal is used by clinicians, caregivers and patients at any time of the day or night, the administrator may not always know when a problem is taking place. This new technology will give administrators immediate notification if the Portal is down via a Real-Time Alert. The below image depicts the application availability monitor confirming Cerner availability, database connectivity and page load.

Welcome to Health Records Online! Through this portal, you will be able to quickly review select medical records for services provided by your hospital.

To change the display language for the portal, go to the drop down at the top of the page and click on your desired language.

Thank you for using Health Records Online, the secure, efficient and easy-to-use way for you to take greater control of your health, anytime and anywhere.

HEALTH LIBRARY SEARCH AVAILABLE OCTOBER 11, 2016

Search for information about specific health topics related to health issues, laboratory results and medications. Click on the Health Library icon at the top of the page or choose the "Learn more about this" link when reviewing health issues, laboratory results or medications.

PATIENT EDUCATION DOCUMENTATION NOW AVAILABLE

The same patient education provided to you during your visit is now available in a digital copy on your portal. To access your patient education documents, please navigate to the "Health Record" tab, then click on "Documents" on the left hand side. The link titled "Patient Education Notes" will contain your patient education documentation.
